SUMMARY

Backend engineer with **3 years of experience** building enterprise software, APIs, and backend systems used at scale. Strong background in **Java/JEE, JavaScript, Oracle ADF, SQL/PLSQL, and Python** with experience owning features end-to-end, improving performance, supporting production releases, and building **AI-enabled workflows**.

EXPERIENCE

- Oracle India Private Limited** Gujarat, India
Jun 2023 – Present
 - Application Developer 2 — Java, JavaScript, Oracle 12c, SQL/PLSQL, Elastic Search
 - Own backend development for **Oracle Fusion SCM Self-Service Procurement**, delivering production enhancements across Java/ADF and Oracle database layers for a product used by **millions of global users**.
 - Designed and shipped **API and workflow changes** for procurement flows, including Elastic Search integrations that improved retrieval speed and search quality across procurement records.
 - Integrated **AI-driven procurement agent workflows** into self-service flows, contributing to a **10%+ reduction** in procurement cycle friction.
 - Collaborated on Redwood UI performance improvements, contributing to a **99.97% improvement** in page load times on high-traffic procurement views.
 - Diagnosed, fixed, and closed **240+ production bugs and customer issues**, improving product stability and sustaining a high-trust support experience.
 - Built an **AI Sourcing Copilot** during Oracle's internal hackathon, ranking in the **top 21 of 569** submissions.
- BeyondIRR** Remote
Dec 2022 – Jun 2023
 - Software Developer — Python, Flask, FastAPI, Microservices, Cryptography
 - Built and shipped **backend microservices** for fintech workflows including payments, provider routing, and data aggregation.
 - Integrated **4 third-party APIs** into the platform, expanding service coverage with low-latency provider connectivity.
 - Implemented a secure **encrypted payment API** using cryptographic controls to strengthen transaction security between systems.

PROJECTS

- Vigil** | Go, SQLite FTS5, React, Vite | [Link](#) 2026 – Present
 - Built a **local-first observability box** for side projects as a **single Go binary** with embedded React/Vite UI, project ingest keys, append-only NDJSON storage, **SQLite FTS5 search**, trace timelines, and metric/cost summaries.
 - Kept the shipped artifact lightweight at about **14 MB (9.7 MB stripped, 5.4 MB ARM64)** and benchmarked a **10K-event** local dataset with about **2.3 ms** first-page log fetches and about **115 ms** FTS searches; designed the HTTP ingest contract for JS/Python SDK wrappers.
- Rocky Relay** | Python, Ollama, STT, TTS, Raspberry Pi, Swift | [Link](#) 2026 – Present
 - Built a **low-latency personal voice assistant experiment** with a push-to-talk loop across **STT, Ollama LLM, persona transforms, and swappable TTS backends**, plus HTTP audio endpoints, JSONL latency logging, macOS companion support, and a Raspberry Pi client path.
 - Benchmarked Smallest AI, whisper.cpp, macOS say, Piper, Rocky XTTS, and YourTTS paths, measuring the fastest realistic **Smallest STT + Ollama + Smallest TTS** flow at around **2.0s audio-ready**; added **Swiggy MCP** support for food, Instamart, Dineout, saved-address, product, cart, and safe tool-call flows.

SKILLS

Languages: Java, JavaScript, Python, Go, SQL/PLSQL, C++, Dart

Backend: Oracle ADF, VBCS, Flask, FastAPI, Microservices, REST APIs

Databases/Search: Oracle 12c, PostgreSQL, MySQL, MongoDB, Elastic Search, ClickHouse, Supabase

Tools: Docker, Redis, Celery, Git, AWS, GCP, CI/CD,

EDUCATION

- IIIT Vadodara** Gujarat, India
2019 – 2023
 - Bachelor of Technology — Computer Science — GPA: 7.39
 - Courses:** Operating Systems, Data Structures & Algorithms, Artificial Intelligence, Cryptography

ACHIEVEMENTS

- [Google Summer of Code 2022](#), [ScoreLabs](#): selected as **1 of 1,054 contributors worldwide**.
- Security CTF**: 2nd place out of 146+ teams.
- Open-source maintainer and student mentor.
