SUMMARY

Full-stack engineer with **3 years at Oracle** building enterprise procurement products used by **millions of global users**. Owns customer-facing workflows across **React/ADF UIs, Java/JEE services, REST APIs, Elastic Search, and Oracle DB layers**, with experience in client communication, production debugging, and AI-enabled product workflows.

EXPERIENCE

- Oracle India Private Limited** Gujarat, India
Application Developer 2 — Java, JavaScript, Oracle 12c, SQL/PLSQL, Elastic Search Jun 2023 – Present
 - Owned end-to-end delivery for **Oracle Fusion SCM Self-Service Procurement**, shipping customer-facing features across **React/ADF UI, Java/JEE services, REST APIs, Elastic Search, and Oracle DB layers**.
 - Acted as technical point of contact for enterprise escalations, diagnosing and resolving **240+ production issues** across UI, API, workflow, and database layers.
 - Led Redwood UI performance work by profiling bottlenecks and shipping changes that achieved a **99.97% improvement** in page load times on high-traffic procurement views.
 - Designed and shipped **API and workflow changes**, including **Elastic Search integrations**, improving retrieval speed and search quality across procurement records.
 - Integrated **AI-driven procurement agent workflows** into self-service flows, contributing to a **10%+ reduction** in procurement cycle friction.
 - Built an **AI Sourcing Copilot** during Oracle's internal hackathon, ranking in the **top 21 of 569** submissions.
- BeyondIRR** Remote
Software Developer — Python, Flask, FastAPI, Microservices, Cryptography Dec 2022 – Jun 2023
 - Built and shipped **backend microservices** for fintech workflows including payments, provider routing, and data aggregation.
 - Integrated **4 third-party APIs** into the platform, expanding service coverage with low-latency provider connectivity.
 - Implemented a secure **encrypted payment API** using cryptographic controls to strengthen transaction security between systems.

PROJECTS

- Vigil** | *Go, SQLite FTS5, React, Vite* | [Link](#) 2026 – Present
 - Built a **local-first observability box** for side projects as a **single Go binary** with embedded React/Vite UI, project ingest keys, append-only NDJSON storage, **SQLite FTS5 search**, trace timelines, and metric/cost summaries.
 - Kept the shipped artifact lightweight at about **14 MB (9.7 MB stripped, 5.4 MB ARM64)** and benchmarked a **10K-event** local dataset with about **2.3 ms** first-page log fetches and about **115 ms** FTS searches; designed the HTTP ingest contract for JS/Python SDK wrappers.
- Rocky Relay** | *Python, Ollama, STT, TTS, Raspberry Pi, Swift* | [Link](#) 2026 – Present
 - Built a **low-latency personal voice assistant experiment** with a push-to-talk loop across **STT, Ollama LLM, persona transforms, and swappable TTS backends**, plus HTTP audio endpoints, JSONL latency logging, macOS companion support, and a Raspberry Pi client path.
 - Benchmarked Smallest AI, whisper.cpp, macOS say, Piper, Rocky XTTS, and YourTTS paths, measuring the fastest realistic **Smallest STT + Ollama + Smallest TTS** flow at around **2.0s audio-ready**; added **Swiggy MCP** support for food, Instamart, Dineout, saved-address, product, cart, and safe tool-call flows.

SKILLS

Languages: Java, JavaScript, Python, Go, SQL/PLSQL, C++, Dart

Backend: Oracle ADF, VBCS, Flask, FastAPI, Microservices, REST APIs

Databases/Search: Oracle 12c, PostgreSQL, MySQL, MongoDB, Elastic Search, ClickHouse, Supabase

Tools: Docker, Redis, Celery, Git, AWS, GCP, CI/CD,

EDUCATION

- IIIT Vadodara** Gujarat, India
Bachelor of Technology — Computer Science — GPA: 7.39 2019 – 2023
Courses: Operating Systems, Data Structures & Algorithms, Artificial Intelligence, Cryptography

ACHIEVEMENTS

- [Google Summer of Code 2022, ScoreLabs](#): selected as **1 of 1,054 contributors worldwide**.
- Security CTF**: 2nd place out of 146+ teams.
- Open-source maintainer and student mentor.
